

Career Objective:

Seeking a software developer position that demands the best of my skills and where I can contribute to the development of new technologies and work with bright people and in a committed environment.

Profile Highlights:

- Over 8 years' experience in IT.
- Proficient in analyzing the Business Requirements, User Requirement Specifications (URS), Functional Requirement Specifications (FRS).
- Structural designing and coding of solutions as per standards for developing new applications.
- Good understanding of Developer Performance testing for delivering efficient and responsive functionalities.
- Managed and Lead the development of web applications individually.
- Exposure to end-to-end development of various applications right from Designing to Deployment.
- Possess good interpersonal and technical skills that have been put to good use in coordinating with Project Team members in requirements gathering, analysis, implementation, testing and resolving complex issues.
- Effective communication skills due to behavioral training that allows for formal and disciplined behavior and approach.
- Ability to quickly grasp any new technologies and concepts.

Technical Skill Set:

- **Primary Skills:**
 - .Net Stack: MVC, ASP.Net, MVC4, LINQ, WCF, Web Service, .Net Core, Entity Framework, Dapper
 - Scripting Languages: JavaScript, jQuery, knockout, Angular (Knowledge), Nodejs(knowledge).
 - Databases: SQL-Server 2008
- **Additional Skills:**
 - Software Engineering Practices: Style-Cop, FX-Cop, Re-Sharper, Jira, Jenkins
 - Application Servers: IIS
 - Web Technologies: HTML, AJAX, HTML, CSS, Web Services
 - IDE/Tools: Visual Studio 2010/2012/2013/2017, TFS, SVN.
- **Domains:**
 - Travel, Media, Crisis-Communications, Medical

Organizational Scan:

Since 08'2019: Synchroon Technology as Teach Lead.

05'2017--07'2019: Xoriant Solutions Pvt. Ltd. Pune as Senior Software Engineer.

01'2016-04,2017: Capgemini India Pvt. Ltd, Pune as Consultant.

07'2014-01'2016: Cognizant Technology Solutions India Private Ltd as Associate - Projects

10'2012-07'2014: Extentia Information Technology, Pune as Software Professional

01'2011-08'2012: Auxano Technologies Pvt. Ltd., Pune as Associate Software Engineer

Project Experience:

Project Title	Asurion Jcare
Environment	MVC, C#, Entity Framework, XML, jQuery, Knockout, SQL Server 2008
Description	It is the Vodafone insurance provider. Which provides service for theft/loss/damaged phone. There are many ways to log service Requests for loss/damage/theft of Phones or devices. Tack complaints/Request resolved Conflict and Provide resolution to end-user.
Responsibility	<ul style="list-style-type: none">• Working on an agile scrum environment.• Requirement gathering analysis, code development, client communication, handling service request support deployment, bug fixing and unit testing and documentation. <p>Note: I have created tools to help/Reduce time-consuming process and do automation</p> <p>Parameter sniffing Tool: This tool helps to find out missing (parameter sniffing) in-store procedure and provide the below details.</p> <ul style="list-style-type: none">• How many parameters used in Store Procedure.• which Parameter missing Parameter Sniff in Store Procedure.• Latest comparison of Store Procedure in Diff environment (prod, UAT, QA, Dev).• On clicking on Store Procedure link in the UI it directly opens in SQL server. <p>Release Document Generator Tools: This tool helps to Generate Release Document and below the feature.</p> <ul style="list-style-type: none">• It handles 5 Environment and 6 Projects.• It maintains the details of the last created document to each specific Project and Env details.• Auto-generate the last details.• Automatic insert Jira details in Document to Related Sprint.• For Database Document creation, if upload folder it inserts all Store procedure, function, trigger, script List in Documents.• After a complete creation document, it's automatically open in MSWord.

Project Title	BlackBerry AtHoc
Environment	MVC, C#, Entity Framework, XML, jQuery, Knockout, SQL Server 2008
Description	BlackBerry AtHoc is the leading provider of networked crisis communications to defence, military, federal government agencies, state and local government, healthcare, and commercial enterprises on a global scale. Our mass notification systems are being used daily as both an all-purpose alerting and mass emergency warning system.
Responsibility	<ul style="list-style-type: none">• working on an agile scrum environment.• Requirement gathering analysis, code development, client communication, handling service request support deployment, bug fixing and unit testing and documentation.• Involved in Making Changes to existing web applications according to feedback received from the end-user or clients.• Performing software testing and stringent quality check as per QC guidelines to ensure an error-free as well as optimum Product to the user.• Involve in release Phase.

Project Title	Conflict Management System
Environment	WPF, C#, XML, Sybase(Database)
Description	The Conflict Management System (CMS) allows for the entry, approval processing and storage of global conflict clearance requests in a confidential database, Conflict Clearance requests are submitted across the firm to pre-clear or provide notification of certain types of potential business activities that may give rise to the conflicts. The CMS is made up of 4 applications. Conflict management Web/Mobile (for firm-wide Requesters and Reviewers) and Conflict Administrator Desktop/Mobile (for designated Administrators across Multiple BUs namely Company Management, IBD and Sales & Trading).
Responsibility	<ul style="list-style-type: none"> ● Requirement gathering analysis, code development, client communication, handling service request support deployment, bug fixing and unit testing and documentation. ● Involved in Making Changes to existing web applications according to feedback received from the end-user or clients. ● Performing software testing and stringent quality check as per QC guidelines to ensure an error-free as well as optimum Product to the user. ● Involve in release Phase.

Project Title	RHMS (Role Hierarchy Management System)
Environment	ASP.Net, MVC4, C#, JavaScript, jQuery, JSON, CSS, SQL Server 2008
Description	Role and Hierarchy Management System (RHMS) is the single source of truth for key roles and hierarchies within Cognizant. It is used for role creation, modification and deletion. RHMS uses set business rules and policies related to roles, which are maintained centrally. The user role creation in RHMS includes an approval workflow before the role is granted to the user. Organizational hierarchies such as BU, Vertical and Horizontal are maintained here. It also maintains a master list of organizational entities like Global Markets, BU, SBU, Vertical, Parent Customer, etc. and manages their inter-relationships.
Responsibility	<ul style="list-style-type: none"> ● Working on an agile scrum environment. ● Requirement gathering analysis, code development, client communication, handling service request support deployment, bug fixing and unit testing and documentation. ● Involve in database DDL, DML operation. ● Performing software testing and stringent quality check as per QC guidelines to ensure an error-free as well as optimum Product to the user. ● Involved in deployment and Code optimization. ● Team management

Project Title	The Travel Platforms (TTP)
Environment	ASP.Net, C#, jQuery, WCF, SQL Server 2008
Description	<p>The project Online Hotel, Transfer & Excursion booking B2C web application. In this application we are using third party RoomsXML and HotelBeds web services for Booking and 5th Dimension payment gateway for the online transactions. This application has the following features:</p> <ul style="list-style-type: none"> ● Registration of new customer ● Searching for worldwide Hotel, Transfer & Excursion ● View Hotel, Transfer & Excursion information with Price & Images ● Add multiple items in shopping cart ● Make payment through 5th Dimension payment gateway ● Book Hotel, Transfer & Excursion through web services ● Cancellation of booking Refund payment ● Send email to Customer & Admin and Back office Maintenance
Responsibility	<ul style="list-style-type: none"> ● Analysis and gathering requirement for the framework and creating a design for final software output. ● Consume service provided by Third parties and create class structure according to that. ● Involve in database structure creating DDL, DML Operation. ● Performing software testing and stringent quality check as per QC guidelines to ensure an error-free as well as optimum Product to the user. ● Involvement in Deployment Process.

Project Title	Lovely Stay
Environment	ASP.Net, C#, jQuery, WCF, SQL Server 2008
Description	<p>The project was based on a hotel booking B2C web application. In this application we are using a third party RoomsXML web service for Hotel Booking & PayPal payment gateway for online transactions. This application has the following features.</p> <ul style="list-style-type: none"> ● Registration of new customer ● Search for worldwide Hotels ● View Hotels & Rooms information with prices ● Make payment through PayPal payment gateway ● Book Hotel rooms through RoomsXML web service ● Cancel Rooms booking & Refund to customer ● Import master data from RoomsXML web service ● Reports regarding Booking & Cancellation ● Sent Email to the customer on Booking & Cancellation
Responsibility	<ul style="list-style-type: none"> ● Analysis and gathering requirement for the framework and creating a design for final software output. ● Consume service provided by Third parties and create class structure according to that. ● Involve in database structure creating DDL, DML Operation. ● Performing software testing and stringent quality check as per QC guidelines to ensure an error-free as well as optimum Product to the user. ● Involvement in Deployment Process.

Project Title	LAP (Life's A Party)
Environment	MVC3, ASP.Net 4.0, C#, jQuery, SQL Server 2008
Description	This project was developed for Lap. Who are arranging the parties for Bollywood Stars, develop this Project in MVC, It Include Functionality of Content Management, Ajax, flow players, Panning Pages, Dragging Pages using jQuery?
Responsibility	<ul style="list-style-type: none"> ● Analysis and gathering requirement for the framework and creating a design for final software output. ● Developing a web-based software using a computer programming language such as asp.net, MVC, jQuery, WCF Service and MSSQL. ● Performing software testing and stringent quality check as per QC guidelines to ensure an error-free as well as optimum Product to the user. ● Involvement in Deployment Process.

Project Title	Star Plus
Environment	Silverlight, C#, SQL Server 2008
Description	This project was a Web version of the touch application and created for the internal official purpose (What's happening in the channel). This site implements feature channels, shows, and Episode. And we can Monitor TVR ratings of channels and compare across the channel also with shows. We can compare character, character relationships of all episodes.
Responsibility	<ul style="list-style-type: none"> ● Analysis and gathering requirement for the framework and creating a design for final software output. ● Involve in database structure creating DDL, DML Operation. ● Performing Manual software testing and quality check as per QC guidelines to ensure an error-free as well as optimum Product to the user. ● Involvement in Deployment Process.

Project Title	Cipla
Environment	MVC3, ASP.Net 4.0, C#, jQuery, SQL Server 2008
Description	This project on the Cipla website, which is a Pharmaceuticals Company, which has many products, events and many speeches given by different Doctors. It includes the Functionality of Content Management, flow players, image Gallery, Image Slider, Accordion Layout on Pages using jQuery.
Responsibility	<ul style="list-style-type: none"> ● Requirement gathering analysis, code development, client communication, handling service request support deployment, bug fixing and unit testing and documentation. ● Involve in database DDL, DML operation. ● Performing software testing and stringent quality check as per QC guidelines to ensure an error-free as well as optimum Product to the user. ● Involved in deployment and Code optimization.

Education Qualification:

Qualification	Board \ University	Year Of Passing
B.Sc. (bachelor's in science)	Purvanchal University, Jaunpur	2006
12 th	UP Board	2003
10 th	UP Board.	2001

Certification:

- Certified Course in Microsoft Technology, NIIT, Mumbai, Maharashtra
- Certified Course in SQL Server 2008, NIIT, Mumbai, Maharashtra.

Personal Details:

Name	Santosh Kumar Maurya
Date of Birth	23 rd December 1986
Marital Status	Married
Hobbies	Music, Movies, Cricket, etc.
Languages Known	English, Hindi

I hereby declare that the information mentioned above is true to the best of my knowledge & belief.

(Santosh K. Maurya)
